Dear Customer,

At Danfoss IXA our products are subjects to continuous development and updates. We strive to keep our customers informed regarding these developments and updates hence we send you this Service Note for MES1003. Kindly read the below information.

MES1003 Software Update

MES1003 has received a software update to SW version 1.2.6. Instructions on how to update the MES1003 is described in section 2.3.2 *Updating Software* in the User Guide for MES1003. SW version 1.2.6 includes following updates:

- Support for WSR
- Support for 2500 mbar pressure transmitter
- Additional configuration functionality of WSU/WSR
- Alarm coils in ModBus
- LCP improvements to display of measurements
- Cancel calibration in LCP
- Save measurement log to USB from LCP
- pH sensor stabilization during calibration
- False flow functionality
- WSR alarm if draining to bilge pump
- Support added for new part and serial number
- Bug fixes
