

Olympic Shipping and Management S.A unlocks life cycle value and operational efficiency with **Refurb Program**

The Greek based company Olympic Shipping and Management S.A is responsible for the technical management of their fleet of commercial vessels focusing on optimizing services provided by the crew, vessel safety as well as environmental protection.

Operational efficiency, regulatory compliance, and lifecycle reliability are key focus areas for Olympic Shipping and Management S.A.

Refurb Program

Maximizing lifecycle value with MES 1001 MARPOL and Refurb Program

With a Danfoss IXA CEMS solution for emission monitoring of NO_x, SO₂ and NH₃ and the associated service and refurb program, Olympic Shipping and Management S.A. have chosen a CEMS solution for their fleet of vessels, that extends emission analyzer lifetime, delivering reduced cost and long-term sustainable lifecycle management.

Customer testimonial

Mr. Plousakis Georgios, Technical Director, Olympic Shipping & Management S.A. says:

"We have chosen an emission monitoring solution with the MES 1001 MARPOL from Danfoss IXA that gives us a robust emission measurement performance for regulatory compliance and optimized operational efficiency. In addition to the analyzer installations on our vessels, we have engaged in Danfoss IXA's refurb and service program, ensuring long-term reliability, consistent performance, and a cost-effective lifecycle support".

Danfoss IXA perspective

Paolla Mota, After Sales Manager at Danfoss IXA, says:

"Our refurb program is creating great value for our customers because sustainability and customer benefits go hand-in-hand, when our customers receive a refurbished analyzer as replacement for an existing, end-of-life unit" says Paolla Mota, After Sales Manager, Danfoss IXA.
